How Beyond Works

4 Stages to Your Next Career Move.
Follow at your own pace.

STAGE 1: Discover

Know who you are before you look for a job. Clarify your values, strengths, and interests. Watch career interviews with PhDs who landed roles you haven't considered. Build your personal fit criteria.

STAGE 2: Research

Find careers that actually fit you. Explore jobs across industry, government, nonprofits, and academia. Compare roles using your fit criteria and build a shortlist worth pursuing.

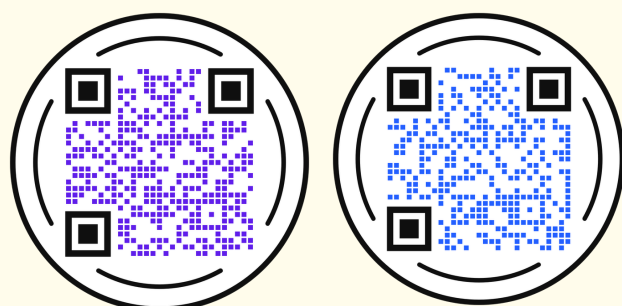

STAGE 3: Implement

Stop hoping. Start executing. Build a resume that speaks to employers, develop a networking plan, and prepare for interviews with confidence.

STAGE 4: Build

Land the role. Then grow from there. Prepare for your first 90 days, navigate workplace culture, and build a long-term career mindset.
